

# POWER PLUS® DEGREASER

PREMIUM QUALITY MULTI-PURPOSE CLEANER

## HISTORY:

Manufacturing of original product was started in 1972.

Power Plus was originally manufactured for the Steam Cleaner Industries for use in Pressure Washers. It performs exceptionally well in all types of washing, floor scrubbing and degreasing. We have exclusively supplied the Military for Desert Storm and handled National and International distribution with Power Plus.

Power Line has controlled "retail" distribution and our products have only been sold through specialty supply companies and distributors. You won't see our products in Wal-Mart, Sam's, Costco, etc. This gives the end user better service, knowledgeable salespeople, and gives our distributors a much better margin.

## USES:

- Garbage Cans
- Entry ways
- Detail cleaning
- Tile cleaning
- Table tops
- Mopping
- Finger prints
- Carpet cleaning
- Concrete cleaning

## FORMULA OUTLINE:

We blend a proprietary mix of Citrus Oils (D-Limonene based) and a proven non-toxic Butyl Cellosolve with a blend of ultra high performance surfactants and pH builders. The mix is chelated and pH balanced. (Chelation is a process to control "fall-out" or precipitation and extends dilution power. We are one of the very few companies that bottle our product in clear bottles. This also controls scale build-up in pressure washer coils and gives our product a 5 year shelf life.)

## PRODUCT UNIQUE FEATURES:

Power Plus is a true water-based emulsifier. It cleans by penetrating the surface and dissolving the "soils" rather than "burning" the surface like so many other cleaners. "Super Clean", "Greased Lightning", "Zep", "Krud Kutter", "Oil Eater" all use a high % of "Sodium Hydroxide" or in another term, "Lye". Sodium Hydroxide mixes are very inexpensive to make - that is why they sell for \$8.00 to \$12.00 per gallon retail. Cheap cleaners do not dilute out and maintain their cleaning ability! They also "fall-out" when in storage or when heated in a coil. Power Plus' formula maintains 100% of it's pH and cleaning power up to 4 - 1 dilution. (4 parts water and 1 part chemical) The chelation process also allows Power Plus to maintain it's effectiveness - even if diluted with hard water.

STOCK # ASW-1 OR AWS-240Z.

## USDA APPROVED:

Power Plus carries an original USDA use authorization for use around food preparation areas.
